

Application Modeling & Design Course

Lab 1

Topics

- Some tips on your current assignment
- Git, Github
- Java & Visual Studio Code

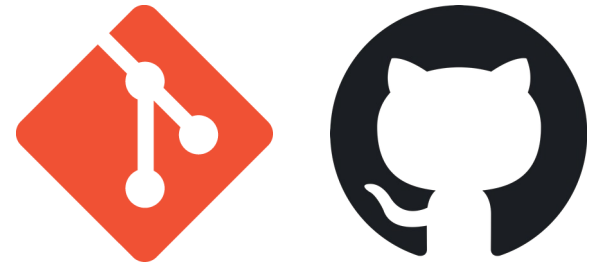

Some hints current on Assignment t 1

- Take note of job requirements
- List all names and definitions of technologies, methodologies, etc.
- If those are the roles you aim at, try to plan ahead how you get familiar and gain the skills

Git & Github

- Go to github.com and create an account using your email
northeastern.edu

In the next lab you will

- use Github Classroom and get the demo assignment:
 - <https://classroom.github.com/a/kEMNjSZG>
- Once you accept the demo assignment, you will have your own repository with **your code**.

Visual Studio Code & Java

- Installation instructions are on Canvas.

Visual Studio Code

**UNIFIED
MODELING
LANGUAGE**

UML Diagrams

- We will use Class diagrams in this course
- Use this link to check out what UML diagrams are:
 - <https://www.youtube.com/watch?v=UI6lqHOVHic>
